Bachelor of Science in Arts Technology– 3.7 GPA

## Professional Experience

**Podverse**                                                                                          2020

*Intern*

• Performed quality assurance testing on React and React Native apps, across iOS, Android, & Web.

• Updated and maintained the database to add new podcasts as requested by users.

**Garfield Building Maintenance**                                                             2019 - 2020

*Webmaster*

• Designed and programmed a new responsive static website for Garfield Building Maintenance.

• Managed the domain registration and handled deployment of the new website.

**Weaver Consultants Group**                                                                      2018

*Software Support Specialist*

• Developed a PHP web app to analyze readings and data-trends from excel files containing site data.

• Assisted coworkers from all departments in computer and Active Directory related troubleshooting.

**ISU's College of Arts and Sciences IT**                                                     2016 - 2017

*Web Developer / Project Manager*

• Managed the development of new and existing university websites and their features.

• Led new employees on onboarding procedures and designated tasks.

## Portfolio

**Video Game Portal**

A responsive web app built with React, populated with data from the world's largest video game API.

• Demo: [kylefdowney.github.io/GameAPI/](https://kylefdowney.github.io/GameAPI/)

• Repo: [github.com/kylefdowney/GameAPI](https://github.com/kylefdowney/GameAPI)

**Various Projects**
